The Recipe Store MS3 Project – W3C Validator Output

The project was firstly parsed on Google Chrome browser then, right clicked 'view page source' and HTML copied, then run through the W3C validator. This was done to eliminate the flask/python errors that would flag when running the HTML raw before the browser had parsed it. Remaining warnings for each html documents are below with explanations.

The following html files gave the same warnings.

base.html, createrecipe.html, editrecipe.html, login.html & signup.html

1. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** add identifying headings to all sections.
   From line 19, column 9; to line 19, column 29
   >   <section id="NavBar">

2. **Warning** **Consider using the** `h1` **element as a top-level heading only (all** `h1` **elements** are treated as top-level headings by many screen readers and other tools).
   From line 53, column 13; to line 53, column 16
            <h1>Welcom

3. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** add identifying headings to all sections.
   From line 47, column 9; to line 47, column 31
   >   <section id="contents">

- Errors 1 & 3 refer to sections lacking headings. Error 1 is a Navbar and does not require a H1 level heading, Error 3 is a section to be filled with block content so is effectively an empty space on the base.html and does not require a heading.
- Error 2 refer to the Page Title which is displayed as a H1 and aesthetically is required to be a H1 heading so the error should be ignored.

myrecipes.html

1. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** add identifying headings to all sections.
   From line 19, column 9; to line 19, column 29
   >   <section id="NavBar">

2. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** add identifying headings to all sections.
   From line 51, column 9; to line 51, column 31
   >   <section id="contents">

- Errors 1 & 2 refer to sections lacking headings. Error 1 is a Navbar and does not require a H1 level heading, Error 2 is a section to be filled with block content so is effectively an empty space on the base.html and does not require a heading.

Search.html

1. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** [add identifying headings to all sections](#).

   From line 19, column 9; to line 19, column 29

   `>↵        <section id="NavBar">↵`

2. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** [add identifying headings to all sections](#).

   From line 55, column 1; to line 55, column 35

   `ories -->↵<section class="section container">↵    <`

3. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** [add identifying headings to all sections](#).

   From line 84, column 1; to line 84, column 27

   `earch -->↵<section class="container">↵    <`

4. **Warning** **Section lacks heading. Consider using** `h2` - `h6` **elements to** [add identifying headings to all sections](#).

   From line 51, column 9; to line 51, column 31

   `>↵        <section id="contents">↵`

- Errors 1 to 4 refer to sections lacking headings. Similar to above errors these warning can be discounted for layout reasons.
